

digiMARK Solvent Perfect Poster Paper

product specification

digiMARK Solvent Perfect Poster Paper is a specially developed paper for digital ink-jet printing. The excellent coating is printable with solvent, UVC and latex inks.

The main field of application for this paper is the production of posters and display advertisements for indoor applications because of the brilliant colour reproduction. Solvent Perfect Poster has an excellent flatness.

processing

The drying time depends on the amount of ink and the ink technology. For outdoor applications lamination is needed. Before lamination the prints have to be dried and fumigated completely otherwise there is a risk of getting bubbles between media and lamination film. To avoid fingerprints the use of cotton gloves is advisable.

application

Posters and display advertisements for indoor applications.

specification

Material	coated paper
Finish	semi matt
Colour	white
Weight	200 gsm, wood free
Opacity	99.5% (ISO2471)

Different printers, inks, resolutions and printing qualities result into numerous different printing parameters. In addition, there are numerous factors influencing processing and the application of our materials. For this reason, we cannot make specific statements as to drying times and maximum ink absorption. For this reason, we recommend you to perform own test in order to verify the desired results. Our product specifications are not to be understood as legally binding guarantees assuring specific characteristics. Any liabilities and guarantees, as well as claims for compensation beyond the value of the product itself are excluded.
